IDENTIFICATION TECHNOLOGY

## Die-Cut Targets

### Pre-Cut Shapes are a Low Cost Option

IR.Tools™ Die-Cut Thermal targets are the perfect solution for target training with a Thermal Weapon Sight. Die-cut targets easily convert any surface into a thermal target; just peel and stick. This a a low cost training option , convenient and easy to use.

Circles, squares, rectangles, trapezoids, guns, etc... can be used to make people, vehicles and structure targets.

Tested and Approved by NATO.

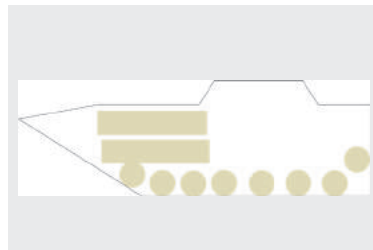

Patent #US 7,528,397
