

Vehicle ID

4' x 4' Thermal Panels for Humvees, Trucks and Tanks

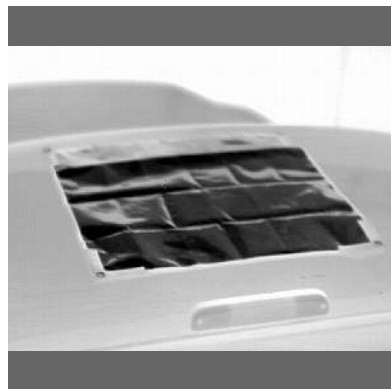

These 4' x 4' Thermal identification panels are used with a Thermal imaging device. Excellent for air to ground signaling and quick ID in any given terrain or combat situation. Dark contrast of panel with surroundings identifies location and prevents friendly fire casualties.

Features

- For use with a Thermal imaging device (FLIR)
- Size 4' x 4'
- Boresight and Apache panels
- Tan, Orange color film panels
- Orange ripstop nylon backing

Boresight Front Panel

Panel appears dark on roof top and identifies location

Tan Front Panel
